Experience

Senior Process Engineering Data Analyst

February 2018 - Present

Memorial Sloan Kettering Cancer Center, New York, NY

- Collected, analyzed, and presented data on hospital operations to Executive Leadership. Results informed both short and long term solutions to mission critical capacity constraints.
- Performed statistical analyses of multiple clinical initiatives in collaboration with clinicians and administrators. Results helped ensure that our initiatives enhanced operational efficiency without harming patient outcomes.
- Provided data processing and analytical support for dozens of process improvement projects run by team members. Helped mentor and train a team of Process Engineers on SQL, R, and Git.
- Collaborated actively with data analysts across the organization. Developed functionality and approved pull requests for submissions to internally maintained R package.

Data Scientist

September 2017 - January 2018

Mattersight Corporation, Chicago, IL

• Developed and contributed to internal R package for data processing, model fitting, and prediction.

Data Scientist *University of Chicago Urban Labs, Chicago, IL*

July 2015 - August 2017

- Trained, evaluated, and analyzed predictive models on multiple large administrative datasets using Machine Learning algorithms and regression techniques.
- Conducted statistical analyses and created data visualizations for review by government agencies, academic partners, and philanthropists, as well as for academic and mainstream publications.
- Recruited, interviewed, and oversaw work of research assistants and junior data analysts.

Economist

October 2008 - August 2013

American Society of Composers, Authors, and Publishers

- Oversaw the design and implementation of a quarterly survey of musical works performed over Internet licensees. Assisted in the design of a survey of musical works performed over Television and Radio.
- Contributed to the distribution of license fees based on survey results.

Education

University of Chicago, Harris School

2013 - 2015

Masters in Public Policy

New York University, College of Arts and Sciences

2004 - 2008

Bachelor of Arts, Cum Laude. Economics and Music

Technical skills

- Data manipulation and analysis advanced R (tidyverse, data.table), intermediate Python (Pandas, NumPy), 10+ years SQL.
- Machine Learning caret, xgboost, glmnet, randomForest, scikit-learn.
- Data Visualization (ggplot2, htmlwidgets, beginner D3).
- Reproducible research and version control (Git, RMarkdown).
